

PARENTING WITH LOVE AND LOGIC

Love and Logic is a research-driven, whole-child philosophy founded in 1977 by Jim Fay and Foster W. Cline, M.D. They are **dedicated to making parenting and teaching fun and rewarding**, instead of stressful and chaotic. We are offering four sessions when parents and school staff members will learn about practical tools and techniques that help adults achieve respectful, healthy relationships with their children/students that is neither permissive nor punitive.

- Learn how to discipline kids without losing their **love and respect**.
- Focus on helping children develop personal **responsibility, self-control** and good **decision making skills** while nurturing **long-term relationships** and reinforcing **good character**.

Come to one or all four sessions. Each one is unique. [Click here to register.](#)
